Dear American Public Works Association Members,

On behalf of the Streets and Equipment Services Divisions Board of Directors, welcome to Hickory, NC and the 2014 Combined Annual Conference!

As you can see from the agenda, the Boards have been hard at work to put together a valuable and exciting program for you. After the joint session (shown in **Green**) on Monday morning, you are free to attend your choice of Streets topics (shown in **Red**), or Equipment Services topics (shown in **Blue**) for the remainder of each day. These sessions will provide useful information and training beneficial to all who attend. Wednesday morning will include a full breakfast and wrap-up sessions for each Division.

Please be sure to visit our indoor and outdoor vendors! These are the folks who truly make our conference a success! Our vendors offer many money-saving products and services on display to consider for your municipality. One money-saving idea or product could justify your attendance for this year and years to come. If this has been your experience please give us your testimony; your success is our success!

As part of the “behind the scenes” work, we have **redefined the program** to match vendor and sponsor needs. For starters, we staggered the training sessions so that conference participants will not be in sessions all at the same time. This means **more face time** at the vendor booths. Secondly, the program has been structured to allow vendors the flexibility to stay for the entire conference or only for a single night. We hope that these changes will contribute to your conference value.

One last note, please join us for a **Corn Hole Tournament** on **Monday Night** and **Karaoke** on **Tuesday Night**. You will have a blast!

On behalf of the Boards of Directors, we hope you enjoy our combined conference.

Sincerely,

Robert Wayne - President
Equipment Services Division

Ken Martin- President
Streets Division
